

Dyscalculia Self-Test with Mathematical Questions

Instructions: Answer each question honestly based on your experiences and abilities. Choose the response that best fits you.

Basic Arithmetic: Solve the following problem mentally: $15 + 27 =$

- A) 42
- B) 38
- C) 52
- D) 33

Multiplication: Calculate: $7 \times 8 =$

- A) 56
- B) 64
- C) 48
- D) 42

Subtraction: What is the result of: $64 - 29$?

- A) 35
- B) 27
- C) 38
- D) 45

Estimation: Estimate the answer to the following: If a person is driving at 60 miles per hour, approximately how far will they travel in 3 hours?

- A) 120 miles
- B) 150 miles
- C) 180 miles
- D) 200 miles

Fractions: What is the result of adding $\frac{1}{4}$ and $\frac{1}{3}$?

- A) $\frac{5}{7}$
- B) $\frac{3}{8}$
- C) $\frac{7}{12}$
- D) $\frac{2}{5}$

Score Interpretation:

- **Mostly A's:** Your responses suggest a strong understanding of basic mathematical concepts, which may indicate that Dyscalculia is less likely.
- **Mostly B's:** While you may have some difficulties with certain math concepts, they may not be indicative of Dyscalculia. Consider seeking additional practice or resources to strengthen your skills.
- **Mostly C's:** Your answers indicate some challenges with mathematical concepts, which could be consistent with Dyscalculia. Further evaluation by a professional may be beneficial.
- **Mostly D's:** Your responses suggest significant difficulties with mathematical concepts, which may align with Dyscalculia. Seeking a formal assessment from a qualified professional is recommended for further evaluation and support.

Remember, this self-test provides a general indication and is not a diagnostic tool. If you have concerns about Dyscalculia or other learning difficulties, seeking guidance from a healthcare professional or educational specialist is advisable.
