Seizure Action Plan

Fill it in with your doctor, then share it with the people around you.

WHY IT HELPS

During a seizure, the people around you need to know what to do. A plan made with your doctor shows what your seizures look like, the steps to follow and when to call for help. Keep a copy at home, at school or work, and with anyone who looks after you.

FOUR SMALL STEPS

Describe	Write what your seizures look like, in plain words.
Agree	Go through it with your doctor or nurse and add their steps.
Share	Give a copy to family, school, work and caregivers.
Update	Review it whenever your seizures or medicines change.

WHAT IS INSIDE

Example
A filled plan to show you how.

My plan
Two pages to fill in with your doctor.

Seizure record
What happened each time, and for how long.

Keeping it current
Who has a copy and what changed.

Make it with your care team. Fill in what you know at home. Then finish the steps, the medicine and when to call 911 with your doctor or nurse, and sign it together.

MADE WITH: Dr. Ana Ruiz, neurology

1 What my seizures look like

In words anyone can follow

SEIZURE TYPE	WHAT YOU WILL SEE	USUALLY LASTS	HOW OFTEN
Focal aware	Stares, lips smack, right hand fumbles	1 to 2 min	About twice a month
Tonic clonic	Goes stiff, falls, jerks all over	2 to 3 min	A few times a year

2 What to do during a seizure

Steps from my doctor or nurse

1. Stay with me and stay calm
2. Move hard or sharp things away from me
3. Put something soft under my head
4. Gently roll me onto my side
5. Let me rest, and tell me what happened

3 Rescue medicine

Only if my doctor prescribed one

MEDICINE: None prescribed right now
