90 Day Challenge

One goal, three months, a few daily actions.

WHY IT HELPS

A 90 day challenge gives you three months to work toward one health goal through a few daily actions. Write the goal, choose actions you can record and give each day a place on the grid. The monthly check ins create regular points to look back and adjust your plan.

HOW TO USE IT

Set one goal	Something that matters to your health, agreed with your doctor if you can.
Pick up to three actions	Small, daily and in your control.
Mark the grid daily	One row per action, one column per day.

INSIDE

2	Example: Dev's 90 days	3	My 90 day goal
4	My 90 day grid	5	Weekly notes
6	Check ins	7	90 day challenge review

Make the plan smaller at a check in if you fall behind.

Example: Dev's 90 days

Goal

Be more active and eat better before my three month blood test.

Actions

1. Walk 30 minutes. 2. A vegetable with dinner.

Check ins

Day	Walk days in block	Vegetable days in block	Average steps
30	21 of 30	25 of 30	5,500
60	22 of 30	26 of 30	6,500
90	23 of 30	27 of 30	7,000

Totals

Walk 66 of 90. Vegetable 78 of 90. Steps about 4,000 at the start.
